

ARIZONA DEPARTMENT OF TRANSPORTATION SUPPLEMENTAL REQUIREMENTSⁱ

Introduction

The Arizona Department of Transportation (ADOT) currently (summer 2021) does not have a system setup to evaluate new MSE wall systems. The agency is currently developing a new framework for an Approved Systems List (ASL). The new ASL will be based on the latest specification Section 929 Mechanically Stabilized Earth (MSE) Walls. The prior MSE Walls Pre-approved Systems List, approved by ADOT Geotechnical Services, will remain in approved status until a new Approved Systems List (ASL) is created by Bridge Group.

Submittal Requirements

There are no “supplemental requirements” for an IDEA report submitted to ADOT as the agency is currently developing a new framework for evaluation of MSE wall systems. However, it is anticipated that an IDEA Evaluation Report will be accepted as part of the new framework/process.

ADOT should contact the IDEA webmaster and update this report when their new ASL process has been finalized and implemented. This supplemental requirements report is readily updateable, and a revision number and new date should be noted when updated.

ⁱ Report Ver 1, June 2021.
