

HAWAII DEPARTMENT OF TRANSPORTATION SUPPLEMENTAL REQUIREMENTSⁱ

Introduction

The Hawaii Department of Transportation (HDOT) does not utilize or maintain lists of approved retaining wall systems. When proprietary retaining walls are included in a project, special provisions are included in the contract documents to guide the suppliers and lists system requirements.

Submittal Requirements

There are no “supplemental requirements” for an IDEA report submitted to HDOT since the agency does not utilize or maintain lists of approved MSE and/or gravity retaining wall systems.

The project special provision specification outlines the criteria to which the proprietary retaining wall design shall conform to, and project submittal requirements.

A wall system IDEA report, as part of a project specific submittal, will provide documentation and support on the fabrication of wall system components, and on erection/construction procedures of precast units and related components.

HDOT should contact the IDEA webmaster and update this report if/when their policies, etc. change. This supplemental requirements report is readily updateable, and a revision number and new date should be noted when updated.

ⁱ Report Ver 1, June 2021.
